Aspiring Cloud & DevOps Engineer with hands-on training in **Linux Administration (RHEL), AWS, Docker, Kubernetes, Terraform, Ansible, Jenkins, Git, and CI/CD** practices. Completed DevOps Internship at Lavatech Technology with practical exposure to **Linux server management, cloud infrastructure, automation, and troubleshooting**. Skilled in **deploying and managing cloud resources, containerized applications, infrastructure automation, and system administration**. Passionate about building scalable, automated, and reliable cloud infrastructure.

PROFESSIONAL EXPERIENCE

DevOps Intern | Lavatech Technology

- Managed Linux servers, user administration, permissions, package management, remote access using SSH.
- Worked with AWS services including EC2, IAM, S3, VPC, CloudWatch, Load Balancers, Lambda, CloudTrail.
- Utilized Terraform and Ansible for infrastructure provisioning, configuration management, and automation tasks.
- Implemented Git-based version control and gained hands-on experience with CI/CD pipelines using Jenkins.
- Monitored system performance, analyzed logs, and troubleshooted Linux, networking, and cloud-related issues.

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology

CGPA: 7.57

SVKM Institute of Technology | Graduated 2026

SKILLS

Cloud Platforms: AWS, GCP, Azure

Operating Systems: Linux(Red Hat Enterprise Linux), Ubuntu

DevOps Tools: Docker, Kubernetes, Terraform, Ansible, Jenkins, GitHub Actions

Version Control: Git, GitHub, GitLab

Programming And Scripting: Python, Bash Shell Scripting

Web And Database: Apache HTTP Server, MariaDB / MySQL

Networking: TCP/IP, DNS, SSH, Subnetting, Routing, Firewall Management

Monitoring And Troubleshooting: CloudWatch, Linux System Monitoring, Log Analysis, System Troubleshooting

PROJECTS

AWS Cloud Infrastructure Deployment

- Provisioned and managed cloud infrastructure on AWS using EC2, VPC, IAM, Security Groups, Route Tables, and Load Balancers.
- Implemented centralized monitoring and alerting with CloudWatch to improve infrastructure visibility and reliability.
- Configured secure Linux Server access using SSH key authentication and IAM-based access control.
- Gained hands-on experience in Cloud networking, security, and system administration.

CI/CD Pipeline Automation

- Built end-to-end CI/CD pipelines using Jenkins, GitHub Actions, and Git for automated application deployment.
- Automated build and deployment processes, enabling faster and more reliable software releases.
- Integrated version control workflows with continuous integration practices to improve development efficiency.
- Demonstrated practical DevOps skills in automation, deployment, monitoring, and infrastructure management.

CERTIFICATIONS

- Internship Certification – Lavatech Technology.
